TIME AND LIFE IN THE SILURIAN:
A MULTIDISCIPLINARY APPROACH
Subcommission on Silurian Stratigraphy field meeting 2009
Sardinia, June 4-11, 2009
Proceedings
Edited by Carlo Corradini, Annalisa Ferretti, Petr Storch
UNDER THE PATRONAGE OF

Il Magnifico Rettore dell’Università degli Studi di Cagliari
Il Magnifico Rettore dell’Università degli Studi di Modena e Reggio Emilia
Il Preside della Facoltà di Scienze MM.FF.NN., Università di Cagliari
Il Presidente della Società Paleontologica Italiana

SPONSORING INSTITUTIONS

Università di Cagliari
Università di Modena e Reggio Emilia
Facoltà di Scienze MM.FF.NN., Università di Cagliari
Comune di Goni
Comune di Silius

ORGANIZING COMMITTEE

Carlo Corradini  University of Cagliari, Italy
Annalisa Ferretti  University of Modena e Reggio Emilia, Italy
Petr Storch  Czech Academy of Sciences, Czech Republic
Sebastiano Barca  University of Cagliari, Italy
Maria G. Corriga  University of Cagliari, Italy
Myriam Del Rio  University of Cagliari, Italy
Maurizio Gnoli  University of Cagliari and Reggio Emilia, Italy
Kathleen Histon  University of Cagliari and Reggio Emilia, Italy
Francesco Leone  University of Cagliari, Italy
Alfredo Loi  University of Cagliari, Italy
Gian Luigi Pillola  University of Cagliari, Italy
Sergio Piras  University of Cagliari, Italy
Paola Pittau  University of Cagliari, Italy
Paolo Serventi  University of Cagliari and Reggio Emilia, Italy

SCIENTIFIC COMMITTEE

Stanley Finney  California State University Long Beach, Long Beach, CA, USA
Michael J. Melchin  St. Francis Xavier University, Antigonish, Canada
Juan Carlos Gutiérrez-Marco  Universidad Complutense de Madrid, Madrid, Spain
Charles H. Holland  Trinity College, Dublin, Ireland
Jiri Kriz  Czech Geological Survey, Prague, Czech Republic
Peep Männik  Tallinn Technical University, Tallinn, Estonia
Florentin Paris  Université de Rennes 1, Rennes, France
Jiayu Rong  Chinese Academy of Sciences, Nanjing, China
Hans Peter Schönlaub  Austrian Academy of Sciences, Vienna, Austria
Enrico Serpagli  Università di Modena e Reggio Emilia, Modena, Italy
Jacques Verniers  Ghent University, Ghent, Belgium
INTRODUCTION

After about two years of hard work spent in planning and organizing the Conference “Time and life in the Silurian: a multidisciplinary approach”, Field Meeting of the Subcommission on Silurian Stratigraphy, recently held in Sardinia in June 4-11, 2009, our effort has finally come to an end. The editing of the Conference Proceedings’ volume is now completed, as promised, within one-year by the end of the meeting.

It has been a long but quite rewarding experience. The diverse papers here included are only a part of the multi-faceted contributions presented at the Conference sessions in Villasimius (Cagliari). Nevertheless, as also underlined by our Chairman, they reflect the multidisciplinary approach we strongly insisted on as a main topic when we proposed this meeting. We are firmly convinced that only by data integration and true comparison of results a real knowledge might effectively arise.

This volume also offers a unique opportunity to expose our “special Silurian world” to non-Silurian or, more in general, to non-Palaeozoic people, and synchronize methods and approaches with those employed by specialists working in other time-slices. This has been possible thanks to the courtesy of the Società Paleontologica Italiana. Former President Ruggero Matteucci started with us this adventure accepting to reserve a volume of the Bollettino for our proceedings, present President Andrea Tintori gave us ample spaces to decide and allowed the download of pdf files at the Conference site. The Editor of the journal, Enrico Serpagli, kindly supervised our editorial efforts (but he is a Silurian-man, so it was not too hard to convince him). Furthermore, it is an occasion to make the Bollettino better known outside Italy, as most of the Silurian workers come from abroad.

As usual tradition in a final phase of a project, it is also time of acknowledgements. First of all, this work has been made possible thanks to the precious support of reviewers who have made the real editorial work on the papers, with their accurate revisions, motivating criticism and addressed suggestions. We acknowledge their excellent contributions by naming them here:

A great thank to single authors who have accepted our invitation in publishing in the BSPI and have strictly respected all editorial requests. Special thanks are also due to our respective families, who have tolerated us and our numerous changing moods of this last period.

Finally, a message for the readers of the Bollettino della Società Paleontologica Italiana. They might find a slightly different target in this volume from the usual papers generally included in the journal. This is in the light of the new style of the Bollettino, hoping to find in a not too far future more and more multidisciplinary contributions reflecting the diverse souls of the palaeontological debate developing now in the world.

Carlo Corradini, Annalisa Ferretti, Petr Storch
